Introduction

HOW TO CUT YOUR CROCHET TIME UP TO 50 PERCENT OR MORE!

Who doesn't want to learn how to crochet faster than ever? Pick any of the 100 patterns featured in this book to get started. None of the patterns are complicated and consist of mostly double crochet stitches and chains to work up quickly—most are easy to memorize. But there are ways you can crochet faster. These tricks will help you make a last-minute project in much less time—just the ticket when you've put off starting that wedding or birthday gift, or unexpectedly receive an invitation to a baby shower that is only two weeks away. We've provided enough quick pattern stitches to help you start crocheting faster than ever!

Basically, there are two ways to decrease the crochet time required to complete a project:

1. Change a single crochet to a taller stitch: half double crochet, double crochet or even a treble crochet stitch.
2. Use a larger hook.

Additionally, always work in back bar of the chain on row 1 for a more finished look.

Back Bar of Chain

STITCH PATTERN 19 COMPARING LENGTH USING TALLER STITCHES

All four swatches crocheted with a size H hook.

Worked in single crochet

Measures 7½ x 7½ inches

Worked in half double crochet

Measures 7½ x 11½ inches (*length increases 4 inches more than sc—more than 50 percent*)

Worked in double crochet

Measures $7\frac{1}{2}$ x 15 inches (*doubles the length of sc—that's a 100 percent increase!*)

Worked in treble crochet

Measures $7\frac{1}{2}$ x $23\frac{1}{2}$ inches (*increases length 16 inches more than sc, or 300 percent*)

Simply changing to a taller stitch, for example working in treble crochet instead of double crochet, increases the length significantly—fewer rows are required to reach desired length! Because each of the four swatches shown was worked with the same size hook, the width remains constant.

Increasing the height of the stitch means you need to crochet fewer rows with each hook size increase. How easy is that?

***Note:** Remember to add extra chains to your beginning chain when using taller stitches. You need 1 turning chain for single crochet, 2 chains for half double crochet, 3 chains for double crochet and 4 chains for treble crochet. For example, if the original pattern is a multiple of $6 + 3$, that means each pattern repeat takes 6 stitches and the chain-3 is the number of chains to make after turning the end of row. The chain-3 would represent the height of a double crochet and usually counts as the first stitch of the next row, so if you change from double to treble crochet, chain 4 (1 chain increased) instead of chain 3. If the original pattern is worked in single crochet, unless instructed otherwise, chain 1 at the beginning of a new row and follow pattern across. When changing from single crochet to double crochet, you need to add two extra chains to your beginning chain.*

ACTUAL CROCHET TIME

While many patterns provide an approximate length of time to make a project, the truth is, everyone works at their own pace. The time required to crochet anything is actual crochet time! It's easy to spend an evening crocheting an afghan and if you begin at 7 p.m. and stop at 10 p.m., you are likely to think you spent three

hours crocheting. A phone call from your best friend, fixing a snack, taking a bathroom break or stopping to help a child with homework means those interruptions are not actual crochet time.

There are two quick ways to determine how long it will take you to make any crochet project.

1. A very rough estimate is to figure six to eight hours per skein.
2. After working a few rows of your project, watch the clock and crochet across the next row without interruption—check the clock. If it takes you five minutes to crochet one row, multiply that number (5) times the total number of rows required to determine time required, not including edging or other finishing work. If working on a baby blanket and it takes 20 minutes to crochet across one row and the total number of rows required is 50, $20 \text{ (minutes)} \times 50 \text{ (rows)} = 1,000 \text{ minutes}$. Divide 1,000 by 60 (minutes in one hour) and the total amount of time required to work the baby blanket is approximately $16\frac{1}{2}$ hours. ■

PATTERN NOTES

Double Doubles on page 78 was used for this pattern.

This Scarf measures 6½ x 58 inches worked in double crochet, using size H hook and five pattern repeats, and takes approximately **six** hours to crochet.

Worked in treble crochet, using a size H hook and five pattern repeats, this Scarf measures 6½ x 58 inches and takes approximately **four** hours to make, two less hours than when worked in single crochet! Increasing the stitch height to treble crochet reduces the time to crochet 33 percent.

Worked in treble crochet, using a size M hook and four pattern repeats, this Scarf also measures 6½ x 58 inches and takes approximately **three and a half hours** to make, two and a half hours less than when worked in single crochet! This method decreases your crochet time 42 percent.

While all three scarves measure the same, the time it takes to make each scarf varies dramatically.

Chain-3 at beginning of row counts as first double crochet unless otherwise stated.

Join with slip stitch as indicated unless otherwise stated.

Chain-4 at beginning of row counts as first treble crochet unless otherwise stated.
